

## Inicijalne postavke

1. Svaki student mora imati ili kreirati novi GitHub račun
2. Student se prijavljuje na GitHub sa svojim računom, otvara repozitorij zorislav/Algebra-FE i kreira svoj vlastiti repozitorij <github\_racun\_studenta>/<ime\_repozitorija> korištenjem opcije fork

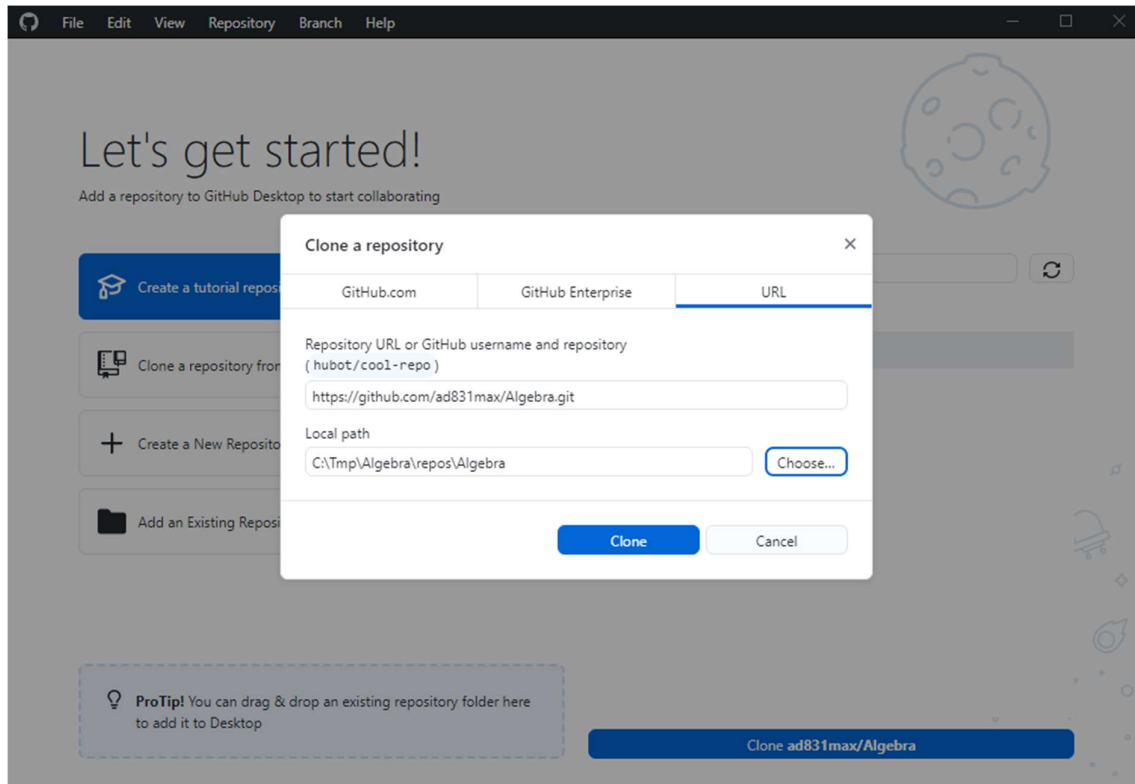

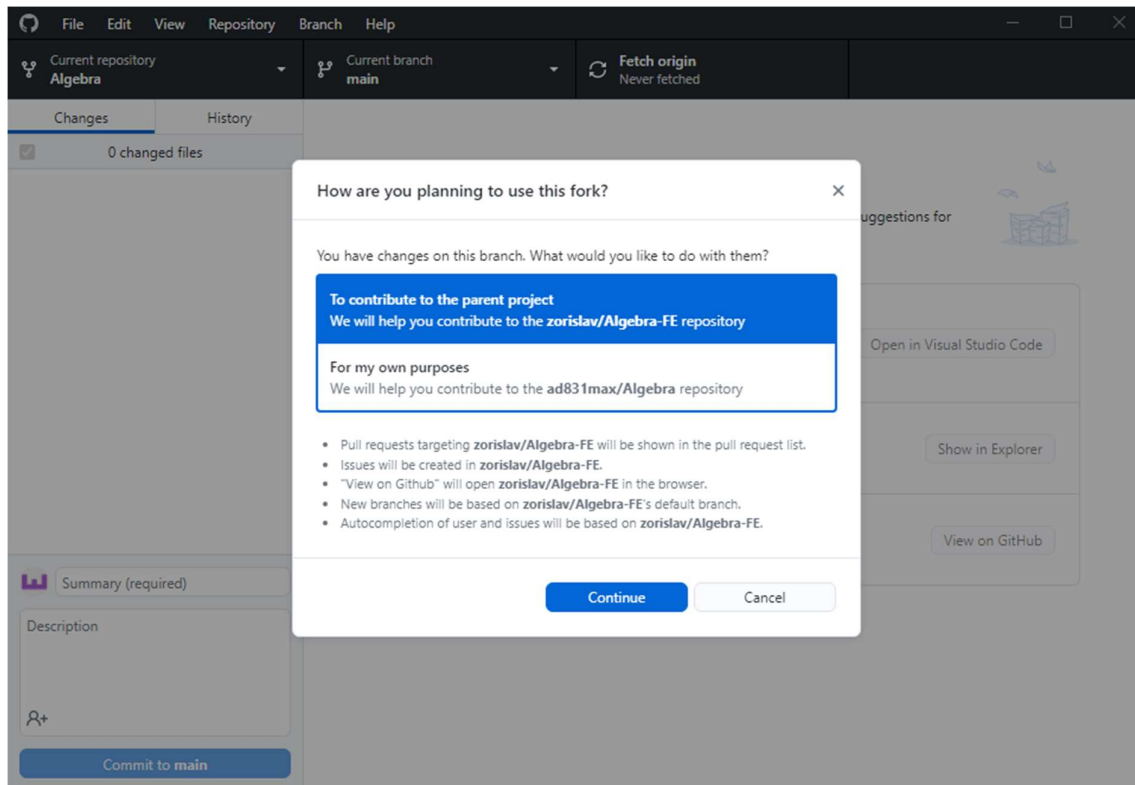

3. Koristeći GitHub Desktop aplikaciju student klonira svoj vlastiti repozitorij  
<github\_racun\_studenta>/<ime\_repozitorija> na svoje računalo

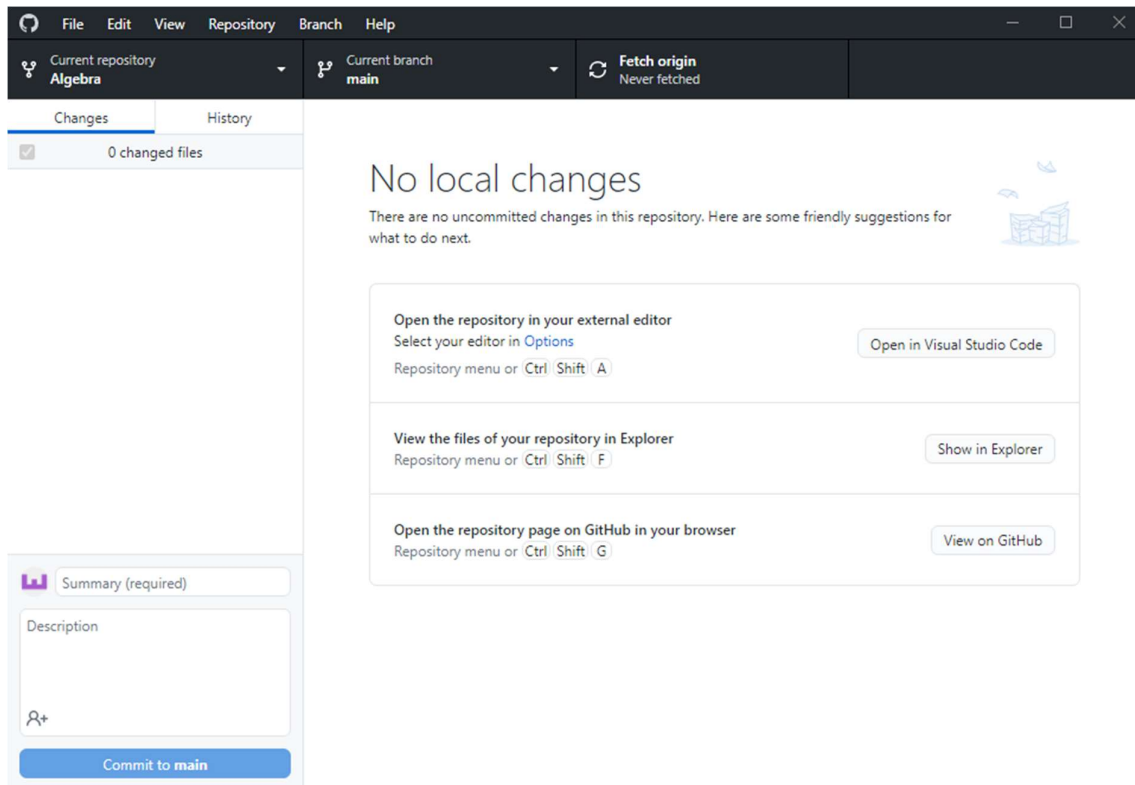

Prije pokretanja akcije potrebno je odabrati folder na računalu gdje će biti smješten repozitorij

Nakon toga potrebno je odabrati način na koji će se izvršiti fork – birati „To contribute to parent project“

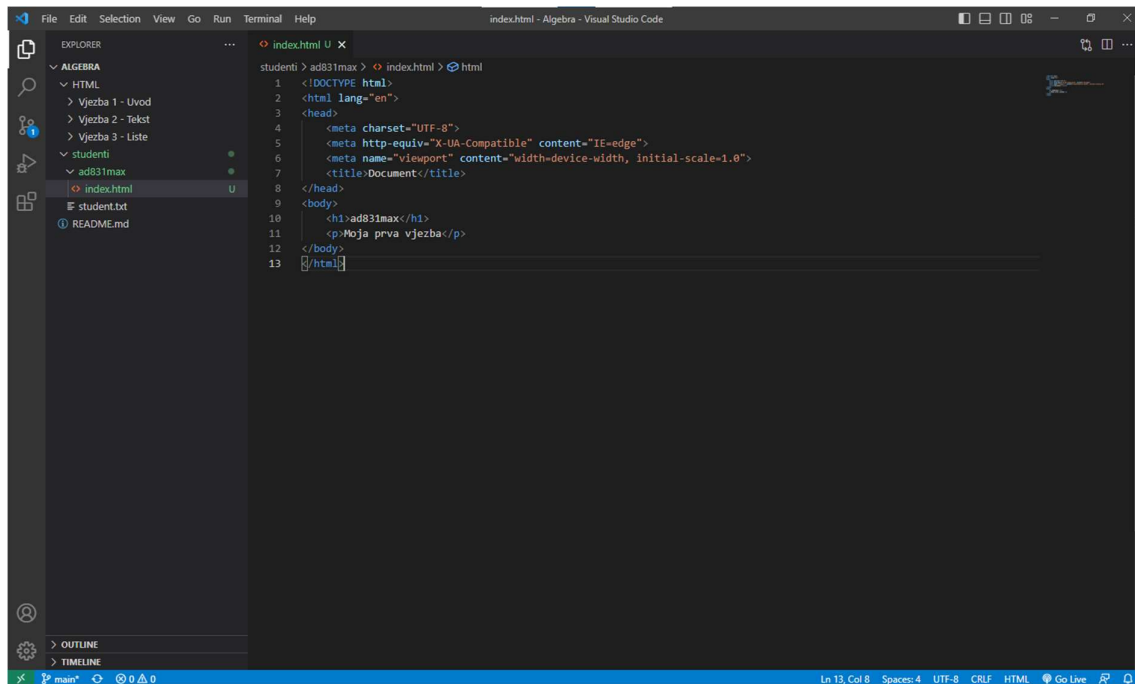

Po završetku student može u GitHub Desktop aplikaciji odabrati opciju Open in Visual Studio Code

## Spremanje lokalnih izmjena u vlastiti repozitorij

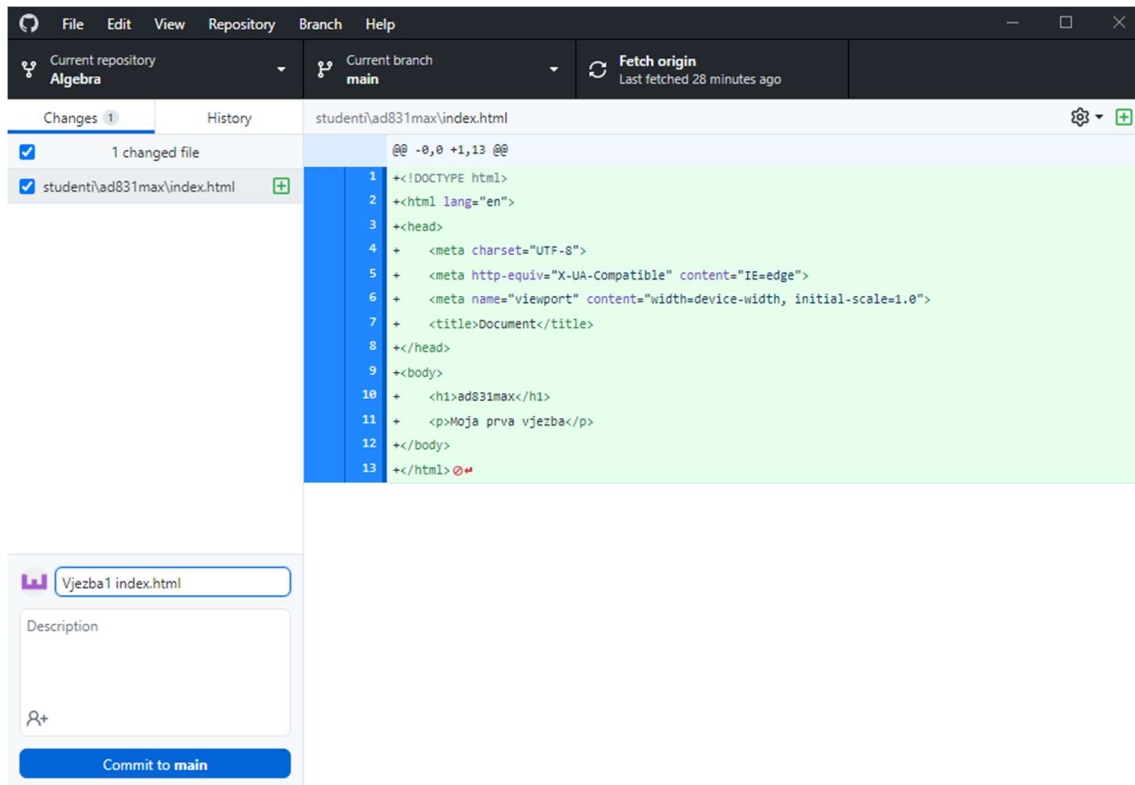

Na svom računalu student kreira novi sadržaj. Preporuka je da za svoj sadržaj student kreira vlastiti folder i da se taj folder zove isto kao i njegov GitHub račun

```
studenti > ad831max > index.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta http-equiv="X-UA-Compatible" content="IE=edge">
6      <meta name="viewport" content="width=device-width, initial-scale=1.0">
7      <title>Document</title>
8  </head>
9  <body>
10     <h1>ad831max</h1>
11     <p>Moja prva vježba</p>
12 </body>
13 </html>
```

Nakon završenog unosa u Visual Studio Code potrebno je sav novi sadržaj spremiti.

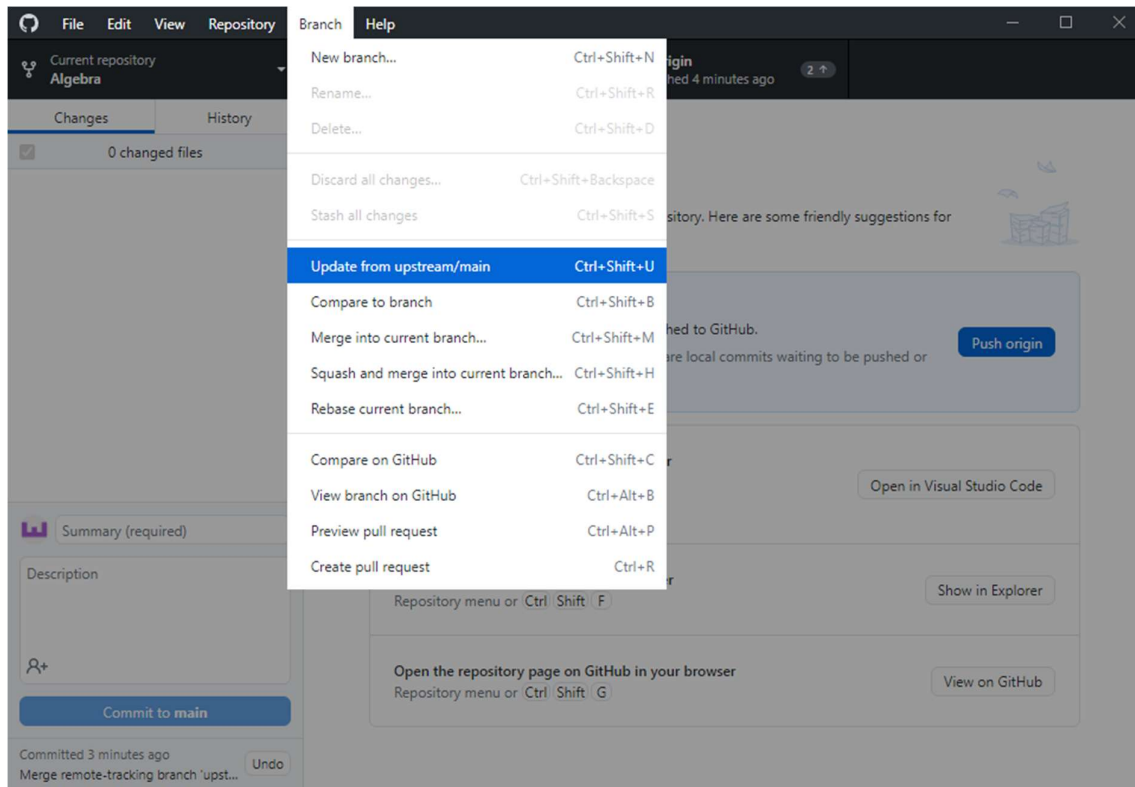

GitHub Desktop evidentira da su nastale promjene u sadržaju. U GitHub Desktop programu je potrebno potvrditi promjene koristeći opciju Commit to main uz obavezan unos komentara.

Student u GitHub Desktop programu pomoću opcije Push origin prebacije promjene u sadržaju sa svog računala u svoj vlastiti repozitorij <github\_racun\_studenta>/<ime\_repozitorija>

## **Povlačenje promjena iz repozitorija predavača**

U GitHub Desktop aplikaciji student bira opciju Update from upstream/main

Promjene iz repozitorija zorislav/Algebra-FE ce biti povučene na računalo studenta.

Nakon toga student mora u GotHub Desktop pomocu opcije Push origin napraviti sinhronizaciju promjena sa računala u vlastiti repozitorij  
<github\_racun\_studenta>/<ime\_repozitorija>

No local changes

There are no uncommitted changes in this repository. Here are some friendly suggestions for what to do next.

Push commits to the origin remote

You have 2 local commits waiting to be pushed to GitHub.  
Always available in the toolbar when there are local commits waiting to be pushed or `Ctrl + P`

Push origin

Open the repository in your external editor

Select your editor in [Options](#)  
Repository menu or `Ctrl + Shift + A`

Open in Visual Studio Code

View the files of your repository in Explorer

Repository menu or `Ctrl + Shift + F`

Show in Explorer

Open the repository page on GitHub in your browser

Repository menu or `Ctrl + Shift + G`

View on GitHub

## Slanje promjena u repozitorij predavača

Student na GitHub-u u svom repozitoriju <github\_racun\_studenta>/<ime\_repozitorija> kreira novi pull request

Potrebno je upisati naziv Pull requesta i po potrebi dodati opis
